

Memory filter

Description

**Photo: permanent, objective (ideally),
recorded, passive**

**Memory: changes with time,
active, subjective**

How to show the difference?

How?

Emotion filters (happy, relaxed, sad, angry, etc)

Note invisible informations on image (date, smell, sound, etc)

Corrupt image (noise, glitch, erase)

Save image

Inspiration

Instagram, Snapchat

Nutshell

Image Glitch Tool

Narrative Clip

1 Second Every Day

Soviet image censoring

Questions

End goal: demonstration or photo diary-creator

Mobile or desktop?

How much control is given to the user?

Instant change or it takes time?
